

WyoComposites, LLC

High performance, GreenSpec® Listed composite building material technologies

COMPANY MISSION

WyoComposites, LLC (“WyoComp”) mission is to lead in the research and development of high performance composite building products that are GreenSpec® Listed and are certified by the USDA’s BioPreferred® Program. The Company is committed to remain at the forefront of natural fiber-polymer composite research by bringing to market new and innovative products that benefit the environment and society while helping to expand the overall product category of natural fiber polymer composites.

Composite Fencing System

Composite decking system

THE COMPANY

WyoComposites, LLC (“WyoComp”), formed in October 2009 by Heath Van Eaton after the closing and loss of all assets by Heartland BioComposites. Heartland BioComposites was originally formed in 1999 by Mr Van Eaton, which is credited as the first company to commercialize and bring to market a full line of agri-fiber polymer composite building materials using wheat straw to reinforce recycled plastic. Mr Van Eaton’s core research and development efforts date back to 1994, focusing on the use of agricultural related fibers in polymer composites using recycled plastics. WyoComp’s corporate headquarters and operations are located in Torrington, Wyoming USA.

TECHNOLOGIES

The Company is the industry leader in proprietary formulation and process technologies that utilize *wheat straw and other agri-fibers* to reinforce *recycled plastic* to create superior performing composite building materials. WyoComp's composite building product technologies are superior in performance, more aesthetically appealing and more sustainable than other commercially available *wood, vinyl* and *wood-plastic composite* products and technologies.

PRODUCT CATEGORIES

Fencing Products and Systems	Planters & Green House Products	Oil & Gas Field Matting Systems
Decking Products and Systems	Pergolas and Shade Louvers	Shipping Pallets
Railing	Door and Other Product Parts	Production Pallets
General Building Materials	Snow Fencing	Specialty Pallets
Outdoor Furniture	Rail Road Ties	Bridges – Pedestrian
Playground Systems	Modular Road Mats	Sign Materials
